

# Burps, Bottoms and Bile

**Open wide – let's look inside! We're on a voyage of discovery to investigate the busy world inside your body.**

We will visit a dentist and find out about different procedures and learn new vocabulary. We'll use this information to write toothy fact files.

There will be lots of investigating as we learn about our teeth, how to brush them and how sugary drinks affect them. We will learn about the amount of sugar in foods and create imprints of our teeth so that we can examine them. We'll write a story describing the journey food takes as it moves through our body as well as learn about the organs involved in digestion and how to make poo!

In DT we shall be designing games that involve creating electrical circuits to support our learning about our bodies and healthy eating. There is going to be plenty of messy, fun learning as we carry out tests and experiments in Science, so get your senses ready!
