

## PLAYLIST

### **Ssh... What's that noise? Is it a bash, a crash, a shake or a hum?**

This half term, we will be listening to lots of different musical performances: picking out the different sounds & techniques. *'The Sound Collector'*, will inspire us to go on a sound walk.

We shall create artwork that represents different types of music to help us visualise rhythm and movement in patterns and images. We will think about the names of our own bands and their 'promo' album as well as design our very own album covers for our band's first LP!

Once we have investigated how instruments work, we shall design and make our own. In the Maker Space we will explore how technology can help us to create musical fruit!

We will also find out how our ear works and then investigate volume & make vibrations using different equipment.

We'll share our favourite music and explore how it is used in everyday life. Our toes will be tapping along to music all half term; listening to lyrics to get lots of ideas to eventually write and perform our own.
