

BLUE ABYSS

Grab your wetsuit! We're going on a deep sea adventure.

We'll visit the fish market and speak to a variety of fish farmers across the island, to gain an insight into our local waters and the ocean world. In art, we will sketch different sea creatures and create clay sculptures of our favourite. We'll also find different ways of grouping living things.

Using maps, globes and atlases, we'll identify the world's oceans. We will learn about the risks that the oceans of the world face and write persuasive letters and non-chronological reports to help inform others.

Diving back in time, we'll learn all about the HMS *Challenger*. We'll research Jacques Cousteau and learn about his explorations. Writing underwater themed dilemma stories, will help us to develop a rich vocabulary.

As scientists, we'll investigate reactions and states of matter by sorting everyday items into solids, liquids & gases and take a close look at the water cycle. As we explore different reactions when solids, liquids and gases are mixed, it will be great fun to make carrot lemonade, bath bombs and whale toothpaste!
