

Spring Term in Nursery!

At d'Auvergne Nursery we believe that children are born with a natural desire to explore and learn. The Nursery Adults can support them by creating an enabling environment for the children to be independent problem solvers and through the relationships and interactions that the children experience.

In the Spring Term the children will be continuing to learn the Set 1 Letter Sounds through the Phonics program of Read, Write, Inc. We will also be looking at recognising numerals, ordering, subitising and finding one more and one less than numbers to 5.

We will be basing some of our learning around '**Our World Around Us**', thinking about people who help us and themes such "Winter" and "Spring", creating activities to accommodate these.
