

Nursery Autumn Term 1

Welcome to Nursery!

At d'Auvergne Nursery we believe that children are born with a natural desire to explore and learn. The Nursery Adults can support them by creating an enabling environment for the children to be independent problem solvers and through the relationships and interactions that the children experience.

In the Autumn Term our topic is '**Independent Me**', the children will be learning routines and skills to foster their independence and will be encouraged to share their interests. From this, the Nursery Adults can plan activities and opportunities for the children to move forward in their learning. We will monitor each of the children closely to find their next steps for development and cater to each of the children's individual needs.

We love working with the children and their families to share special moments from home and to plan experiences which celebrate all children's backgrounds, cultures, languages and abilities.
