

# Year 2 Spring Term

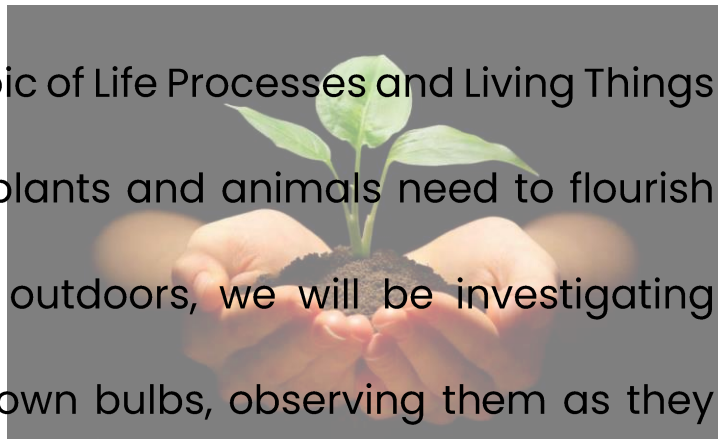

---

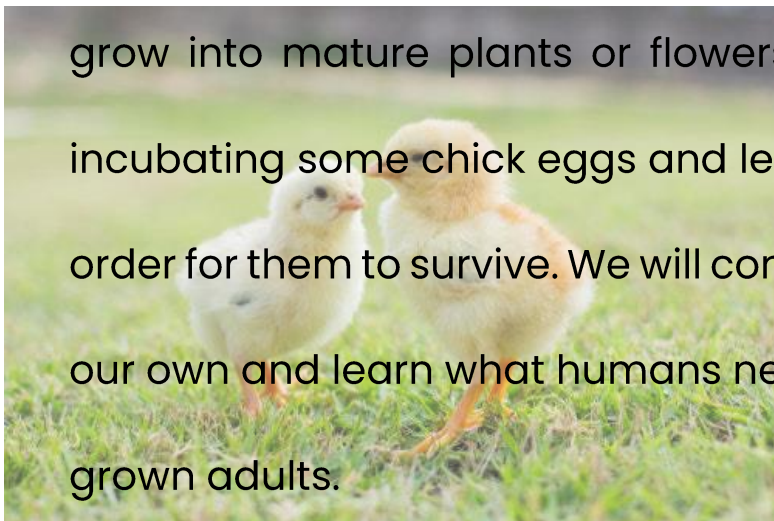

## We Are All Animals!

**Let's explore the world around us and understand what animals and plants need to thrive in an environment!**

This term, our main focus in the topic of Life Processes and Living Things where we will be exploring what plants and animals need to flourish and survive. Whilst enjoying the outdoors, we will be investigating different seeds and planting our own bulbs, observing them as they

grow into mature plants or flowers. Our main Science focus will be incubating some chick eggs and learning how to take care of them in order for them to survive. We will compare different life cycles including our own and learn what humans need to survive and mature into fully grown adults.

In English, we will be working on our comprehension skills during class guided reading sessions and learning the skills that make fluent readers. We will be using the story Beegu as a starting point for our narrative writing and will be writing instructions on how to look after the chicks.
