

What makes the Earth Angry?

In Geography this half term, we will be exploring volcanoes. We will begin by exploring the layers of the Earth and identifying the Ring Of Fire! We will then be thinking about how they are formed, the different types and researching some of the most famous!

Alongside this, our English will focus on stories of volcanoes. Our Reading will be based around 'Ratty's Big Adventure' whilst our writing will be driven by the text 'Escape from Pompeii' which we will use to help us to gather the tools we will need to write our own diary entries.

Our Science topic will also support our learning about the Earth. We will be investigating different types of rock and soil and looking at what we can learn from fossils and archaeologists.

In Makerspace, we will be creating Stop Motion animations based on the events of Pompeii. This will form part of our computing as well as focusing on our understanding of staying safe online.

In RE, our focus for will be on Islamic festivals and worship and Jewish festivals and family life.

Our multiplication and division focus is the 4 times tables.
